Exp. Name: Write a C program to find the Factorial of a given number using S.No: 37 Recursion

Aim:

Write a program to find the [factorial] of a given number using recursion process.

Note: Write the recursive function **factorial()** in Program901a.c.

Source Code:

```
Program901.c
```

```
#include <stdio.h>
#include "Program901a.c"
void main() {
  long int n;
  printf("Enter an integer : ");
  scanf("%ld", &n);
  printf("Factorial of %ld is : %ld\n", n ,factorial(n));
}
```

Program901a.c

```
long int factorial(long int n);
long int factorial(long int n)
  if(n==0)
  return 1;
  else
   return (n*factorial(n-1));
}
```

Execution Results - All test cases have succeeded!

| Test Case - 1 |
|-------------------------|
| User Output |
| Enter an integer : 5 |
| Factorial of 5 is : 120 |

```
Test Case - 2
User Output
Enter an integer: 4
Factorial of 4 is : 24
```

```
Test Case - 3
User Output
Enter an integer :
Factorial of 8 is : 40320
```
