Aim:

Write a program to find the addition of two matrices.

Note:

S.No: 23

- Do use the **printf()** function with a **newline** character (\n).
- If the sizes of two matrices are not equal then print **Addition is not possible** and stop the process.

```
#include<stdio.h>
int main()
   int r1,c1,r2,c2,a[100][100],b[100][100],sum[100][100],i,j;
   printf("Size of mat1: ");
