Page No: 1

Aim:

Follow the instructions given below to write a program to open a file and to print its **contents** on the screen.

- Open a new file "(SampleText1.txt)" in write mode
- · Write the content in the file
- · Close the file
- Open the same file in read mode
- Read the content from file and print them on the screen
- · Close the file

Source Code:

Program1501.c

```
#include <stdio.h>
void main() {
   FILE *fp;
   char ch;
   fp = fopen("SampleText1.txt", "w"); // Open a new file in write mode
   printf("Enter the text with @ at end : ");
   while ((ch=getchar())!='@') { // Repeat loop till read @ at the end
      putc(ch,fp); // Put read character onto the file
 }
   putc('@',fp); // Put delimiter @ at the end on the file
   fclose(fp); // Close the file
   fp = fopen("SampleText1.txt", "r"); // Open the existed file in read mode
   printf("Given message is : ");
  while ((ch=fgetc(fp))!='@') { // Repeat loop till get @ at the end of exist
ed file
      putchar(ch); // Put the character on the screen
}
   printf("\n");
   fclose(fp); // Close the file
}
```

Execution Results - All test cases have succeeded!

```
Test Case - 1
User Output

Enter the text with @ at end : CodeTantra is a
Startup Company recognized by Government of India@

Given message is : CodeTantra is a
Startup Company recognized by Government of India
```

```
Test Case - 2
User Output
Enter the text with @ at end : CodeTantra is
```
